LOCATION, FOUR MILES WEST OF LODI

PECAN TREE TOP GRAFTED

Stuart variety—three years from grafting produced a 25-pound candy bucket nearly full of fine pecans. Tree is growing on the G. W. Forb's place, Elk Grove, California.

WHOLESALE PRICES TO THE PLANTER

OUR PRICES ARE THE LOWEST THAT HAVE EVER BEEN OFFERED
BY ANY REPUTABLE NURSERY

(OUR NURSERY WAS ORIGINALLY LOCATED AT ELK GROVE, CAL.)

*We lost our New Collection at
the California State Fair, the
Burning of the Horticultural Nursery
Sept. 8, 1916*

Specimens only. Charles D. Smith

Advice to Correspondents

This List cancels all previous prices and offers.

OUR GUARANTEE OF QUALITY.—WE GUARANTEE THAT OUR TREES ARE AS GOOD AS CAN BE GROWN. SHOULD THEY PROVE OTHERWISE, THEY MAY BE RETURNED TO US, IN GOOD CONDITION, AND WE WILL REFUND FULL AMOUNT PAID FOR TREES AND TRANSPORTATION CHARGES. IF YOU ARE PLANTING A COMMERCIAL ORCHARD, IT WILL PAY YOU TO VISIT OUR NURSERIES. OUR TREES ARE ABSOLUTELY TRUE TO LABEL AND NAME.

ORDER early that you may get varieties and grades preferred. Write only on one side of the paper.

QUANTITIES AND PRICES.—We furnish 500 trees of one grade and kind at the 1000 rate; 50 at 100 rate and 5 at 10 rate. Thus, 5 peaches, 5 apples, 5 plums would take the 10 rate, but not 2 pears, 2 apples and 1 peach; these would be at the single rate. Trees should be the same price to apply these rates.

SUBSTITUTION.—We never make substitution on commercial orders, but in family orders we can often give a much better variety for home use than that which is ordered, and if out of the variety ordered will substitute as nearly as possible unless requested not to do so.

PACKING.—We pack all plants and trees as nearly perfect as it is possible to do, for which we make a small charge to cover cost of material used. The approximate cost for 6 to 8 ft. trees in bales \$3.00 per 1000; boxed \$6.00; 4 to 6 ft., \$2.50 per 1000; boxed, \$4.00; 3 to 4 ft., \$2.25 per 1000; boxed, \$3.50.

HOW TO SHIP.—Be sure to give route, whether by Express or Freight, and where there is no Agent, be sure to allow enough to pay charges and we will refund any amount above the charges.

DELAY IN SHIPMENT.—Our responsibility ceases when we deliver the trees to the Transportation Companies, the shipment being made at risk of purchaser. However, we will give every assistance in assisting our patrons in adjusting their claims with the Railroad and Express Companies.

ERRORS AND SHORTAGE.—Must be made within 5 days after receipt of the trees that we may rectify them immediately.

UNKNOWN CORRESPONDENTS.—Must accompany their order by cash or satisfactory references.

C. O. D. ORDERS must be accompanied by enough cash to guarantee acceptance of the order.

REMITTANCE may be made in any manner to suit the buyer. Personal checks are acceptable.

PARCEL POST.—We do not recommend shipment by Parcel Post except where delivery cannot be made in any other convenient manner. Orders to be shipped this way must be accompanied by enough to cover postage in full.

SPECIAL QUOTATIONS on large orders.

THIS is our sixteenth year in growing and selling trees, and we ship all over the World where trees are planted.

WALNUT SPECIALISTS.—We were the first Nursery in the United States to Specialize in Grafted Walnut trees. Our Walnut trees are propagated from scions grown on large black walnut trees, which we have grafted and fruited for this purpose, and these have all produced the finest nuts of their respective varieties.

FRUIT BUDS.—These are all cut by members of our firm from the best trees of S. R. Gage and F. P. Gage of Elk Grove, the Tribble Orchard and orchards of McKindly, Corey and other notable orchardists of Lodi and Acampo. Millard Sharpe of Vacaville, Cal., furnishes us with the newer varieties.

WALNUT BOOK will be furnished free on request. It contains 16 pages, and is the only book or circular of its kind published. We have been requested for copies from Public Libraries from many cities in different states.

STATE FAIR PREMIUMS.—We have won at three California State Fairs 27 Awards, consisting of Gold and Silver Medals, First and Second premiums, in competition with the entire State.

BUDS, SCIONS AND CUTTINGS.—We will take orders for buds, scions or cuttings of any trees or vines we offer for sale, but cannot accept any order for less than \$1.50.

APPLES.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.20	\$1.25	\$10.00	\$90.00
3 to 4 ft.	.15	1.00	9.00	80.00

Alexander. Large; yellow, streaked red. Sept.

Arkansas Black. Valuable market variety; maroon, nearly black. Dec.

Baldwin. Deep red; finest flavor. Nov.

Delicious. Brilliant dark red, with splashes of golden yellow at the blossom end. Fine flavor and fine grained.

Early Harvest. Bright straw color. Very fine. July.

Esopus Spitzenburg. Striped red and yellow, pointed. Very fine. Nov.

Gravenstein. Large, striped red and orange. Most popular variety on the Coast. Aug.

Jonathan. Yellow, covered with red stripes; great table and market variety; good keeper and productive. Oct.

King David. Very large; wine red, blotched yellow. Its high color and superb flavor are causing it to be a winner. Oct.

Red Astrachan. Large, deep crimson. A popular and productive market variety, adapted to the warm valleys. July.

Red June. Deep red, very showy; earliest apple. June.

Rome Beauty. Very large; exceptionally beautiful, yellow, shaded and striped with red. Very popular. Nov.

Staymans Winesap. Greenish yellow, splashed with red. Fine market variety. Jan.

White Astrachan. Greenish white, very showy; very popular. July.

Winter Banana. Very large, pale yellow, pinkish bluish. Fancy market variety. Nov.

White Winter Pearmain. Pale yellow. Does well anywhere. A great favorite commercially. Dec.

Yellow Bellflower. Large, oblong; yellow; a standard variety. Oct.

Yellow Newton Pippin. Large, golden yellow; extensively planted in California. Jan.

CRAB APPLES.

One year.	Each	10	100
4 to 6 ft.	\$0.20	\$1.50	\$12.00
3 to 4 ft.	.15	1.20	10.00

Hyslop. Fruit large, deep crimson. Sept.

Red Siberian. Yellow, with scarlet cheek. Bears early. Sept.

Yellow Siberian. Beautiful golden yellow. Aug.

PEARS—On Japanese and Keifer Roots.

(These roots are non-suckering and very blight resistant.)

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$2.00	\$15.00	\$125.00
3 to 4 ft.	.25	1.50	12.50	100.00
2 to 3 ft.	.20	1.25	10.00	90.00

Bartlett. The leading commercial pear of California for canning, shipping and drying. Large, golden yellow, red cheeked. Aug.

Beurre d'Anjou. Large, russet yellow, shaded with crimson. Juicy and delicious. Fine for table and market. Sept.

Beurre Bosc. Large and one of the very finest pears. Heavy bearer. Sept.

Beurre Easter. Large, round, fine grain; most desirable. Oct.

Beurre Giffard. Large, very beautiful and productive. Nov.

Beurre Hardy. Large, greenish russet. Buttery. Very productive. Sept.

Bloodgood. Medium size; yellow, dotted; rich, juicy, sugary. Aug.

B. S. Fox. Very large, greenish yellow, delicious. Oct.

Chinese Imperial. Very rare; from Imperial gardens of Peking, China. Good size, sweet, sugary and very fragrant. Oct.

Crocker Bartlett. Large; rich yellow; flesh, juicy, sweet, rich flavor. Nov.

Col. Wilder. Large; orange color; very sweet, with peculiar flavor. Dec.

Clapp's Favorite. Large, closely resembling the Bartlett; ripens a week or more earlier. An excellent variety. Late July.

Doyenne d'Comice. Large; greenish yellow. Compares very favorably with the Bartlett, but ripens in Oct.

Florelle (Trout). Lemon yellow, splashed with deep red. Very delicious. Oct.

Glou Morceau. Large; pale yellow, speckled; fine grained; sugary; fine shipper. Dec.

Howell. Medium size; yellow, with russet dots. Immensely prolific. Aug.

Lawson (Comet). Large; bright crimson on yellow ground; good shipper. June.

Le Conte. Large, bell shaped; smooth; rich creamy yellow color; fine for cooking and shipping.

Madeline. The earliest pear; pale yellow, good flavor. June.

P. Barry. Very large; yellow; excellent keeper; very regular bearer. Dec.

Rossney. Large; creamy yellow, with crimson blush; very juicy and sweet; quality unexcelled; as good or better than the Bartlett. Aug.

Winter Bartlett. Large, yellow, tender juicy. Very fine. Nov.

Winter Nelis. Medium; yellowish green and of the highest flavor. Dec.

Fragrant Chinese (new). Medium and with a peculiar, delicious flavor. Very fragrant. Used by Chinese to perfume their houses. Tree very large. Sept.

CHERRIES—On Mazzard and Mahaleb.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$1.50	\$12.50	\$100.00
3 to 4 ft.	.25	1.25	10.00	90.00
2 to 3 ft.	.20	1.00	8.00	70.00

Bing. One of the grandest blacks; its large size, firmness and delicious flavor makes it the greatest shipping cherry. Very prolific, and it brings the highest prices. June.

Black Oregon (Llewellyn or Black Republican). Large size, black; young and profuse bearer. July.

Black Tartarian. One of the greatest favorites. Large; heavy bearer; perfection in quality. June.

Burbank. Large; very productive and brings fancy prices; good quality; black. May.

Centennial. Pale yellow, marbled with red. Largest size and best quality; heavy bearer. Early June.

Chapman. The best early variety. Brings the fanciest prices on account of its earliness. Large, black, firm, sweet. Early May.

Early Purple Guigne. One of the best. Purple; tender, juicy, sweet; productive. April.

Giant Biggreau. Largest size; dark red; very sweet, firm and juicy. July.

Gov. Wood. Perfection as a home cherry. Deep yellow, red cheeked and fine for canning and table use. This is the true pollinizer for the Black Tartarian. June.

Lambert. Very large; deep red; fine flavor. One of the leading market varieties. Late June.

May Duke. The finest of the sour cherries; large, dark red and very prolific. Early May.

Reine Hortense. One of the largest cherries; glossy deep red; tender, juicy; the sweetest pie cherry; very productive. June.

Royal Anne (Napoleon Biggareau). The finest light colored cherry; largest size; pale yellow with red cheek; flesh firm and sweet. The greatest cherry for the canneries; also for shipping. It brings good prices. Late June.

Schmidt's Biggareau. Largest size; deep black; very firm; fine flavor; good market and shipping variety. Latest.

CHERRIES—Mazzard and Mahaleb. (New Varieties.)

One year.	Each	10	100
4 to 6 ft.	\$0.50	\$4.00	\$30.00
3 to 4 ft.	.40	3.00	25.00

Abundance. Said to be twice as productive as the Royal Ann. Heavy grower; fruit larger and handsomer; fine for canning. June.

Bassford. Claimed to have been originated by H. A. Bassford of Vacaville, and to be a Lambert seedling. The fruit is very large, many of them packing eight row. Very similar, if not identical with the Bing.

Giant (Burbank's Giant). Claimed to be the largest and most productive of the black cherries. Earlier than the Bing. Very sweet and good.

Early Chinese. The earliest of all cherries; pink color fairly firm; very productive; not subject to gum disease; very hardy. Ripens first of April three weeks before the E. P. Guigne or Chapman; will pack 12, 13 and 14 row. (Should bring remarkable prices.) Very sweet.

Nonpareil. Claimed to be a selected type of the Bing, but ripens two weeks earlier.

Royal Queen. One of the finest Bing types we have seen. The smallest of these pack 9 row, nearly half will pack 8 row and an occasional box of 7 row. Ripens with the Bing.

PLUMS—On Myrobalan.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.35	\$2.00	\$15.00	\$125.00
3 to 4 ft.	.30	1.50	12.50	100.00
2 to 3 ft.	.25	1.25	10.00	90.00

PLUMS—On Peach.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.35	\$2.00	\$12.50	\$100.00
3 to 4 ft.	.30	1.50	11.00	90.00
2 to 3 ft.	.25	1.25	10.00	80.00

Apple. Blood plum. Very large apple shaped; firm and of best quality. Late July.

Bartlett. Yellow, turning crimson; flavor of Bartlett pear; a good fruit. Last of June.

Beauty. Large; very productive; crimson; one of the earliest and brings the highest prices in Eastern markets. This plum sells as high as \$4.75 per crate the first of the season and continues to bring a good price throughout the season. Delicious flavor and fragrant. Last of May.

Burbank. Medium; globular; cherry red, with lilac bloom; flesh yellow. Fine home, canning and market variety. July.

Cherry. The variety used as Myrobalan stock. We have a very large early variety of this type that is fine for cooking and eating. May.

Chinese Red. New importation; better than the Burbank for all purposes; not quite as large. Late June.

Climax. Very large; deep dark red; delicious flavor; tree productive while very young; valuable for Eastern and local markets. Middle June.

Clyman. Reddish purple; firm and sweet; valuable for shipping; very prolific. Best known for pollinating the Tragedy prune. June.

Damson. The old variety so well known and a great favorite for jelly and jam making. Sept.

Diamond. Tree wonderful grower; heavy producer; fruit very large; oblong; dark purple, with deep blue bloom. A splendid shipper, and this, with the Grand Duke, brings the highest prices in the Eastern markets during August and September.

Eureka. An extra large type of the Wickson; otherwise no different.

Formosa. One of the best early shipping plums; tree of the largest size; very productive; the largest early plum; fine for home use; delicious flavor and does not crack. Early June.

Grand Duke. Tree regular bearer; blue, with fine bloom, yellow flesh and fine flavor. Comes in after the last of the Diamonds are picked. Aug.

Green Gage. Large; greenish yellow; juicy; an old favorite. Aug.

Gaviota. Ripens two weeks after the Formosa; fragrant, sweet and very firm. Tree inclined to dwarf. Very productive.

Jefferson. Large, greenish yellow; one of the best for canning. July.

Kelsey Japan. Rich red, overspread with red. A very large, firm, valuable shipping plum. July to Sept.

President. Fruit uniform, very large; purple color; very sweet. Considered one of the best in Vacaville district. New introduction. Sept.

Santa Rosa. One of the best of the Japanese plums; brings the very highest prices in California markets, and sold at top prices in the Eastern markets this season. Very largest size, bluish crimson color; pale blue bloom; flesh streaked with crimson, with a peculiar flavor of its own. Middle of June.

Satsuma. Blood plum; large; dark red from skin to pit; firm; juicy; ships and keeps well. Very desirable for home canning and San Francisco markets. July.

Sultan. Blood plum; very large; deep red flesh, firm and very sugary. Ripens just before the Satsuma.

Simoni (Apricot plum). Large, cinnabar red; flesh yellow, with banana and pineapple flavor. One crate will perfume a whole car load of fruit. Tomato shaped. July.

Vacaville. Originated by W. W. Smith, Vacaville. A very large plum ripening with or just after the Tragedy prune. Blue color and very firm. Sells at very high prices. June.

Vesuvius. Damson type of fruit. Its value is chiefly ornamental, as the foliage and young growth are a beautiful red. Fine for planting in lawns or on by paths.

Wickson. One of the largest plums and one of the best for any purpose. Very heavy bearer, red cheek on yellow ground; flesh yellow, juicy and sweet. Early Aug.

Yellow Egg. An old standard variety too well known for description. July.

Yellow Russian. New; peculiar flavor; bright yellow; good size; sweet and good. Introduced from Russia.

NEW PLUMS.

One year.	Each	10	100
4 to 6 ft.	\$0.40	\$3.00	\$25.00
3 to 4 ft.	.30	2.50	20.00

Apex (Plumcot). The very earliest plum to ripen; fruit large red; fine flavor; ships well and sell for good prices. May.

Banana. Entirely new, medium size; has the exact flavor of a fine banana; color red. July.

Compass (Cherry plum). A delicious, tart little plum, originating in North United States. Fine for jelly or jam.

Gee Whiz (Burbank's New). A very peculiar elongated shape plum, quite attractive and is taking well in the market. Very productive and large size. July.

Gigantic (Burbank's New). Very large yellow plum of fine quality, very firm, and a very heavy producer. Aug.

Glow (Burbank's New). Crimson yellow; large or medium; very good flavor; late ripening in Sept.

Mammoth. Originated by R. E. Burton of Vacaville, and is without question the largest plum grown and the firmest. Fruit is red and ripens in July. The Pacific Rural Press, Aug. 5, 1916, says: "A crate of Millard Sharpe's new Mammoth plums, developed near Vacaville, sold recently in New York for \$7.37½."

Methley (Blood plum). We are proud to offer this new introduction from South Africa. Deep red plum, heart shaped, very largest size, deliciously sweet, firm, very productive, heavy grower, and will sell well. Ripens last of May and early June. Millard Sharpe, California's best posted authority on fruit varieties, says: "I intend planting a number of Methley plums this season."

Pasha (Burbank's New). Mr. Burbank claims for this plum: "Very large, oval; light crimson; great bearing quality; useful for home and near markets." Middle Aug.

Prize (Burbank's New). A large, light red plum that has been bringing good prices from Vacaville. Sept.

Stanford (Plumcot). A true hybrid of the plum and apricot by R. E. Burton of Vacaville. Fruit beautiful yellow; apricot shape; fine flavor; good size, and the best plumcot grown. July.

Smith (Plumcot). Another Vacaville production of true merit by W. W. Smith. Fruit very good size, color and good quality. July.

Vesta. A good home plum, originated by Mr. Burbank, but is no longer listed by nurseries. June.

PRUNE—On Myrobolan.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.35	\$2.00	\$15.00	\$125.00
3 to 4 ft.	.30	1.50	12.50	100.00
2 to 3 ft.	.25	1.25	10.00	90.00

PRUNES—On Peach.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.35	\$2.00	\$12.50	\$100.00
3 to 4 ft.	.30	1.50	11.00	90.00
2 to 3 ft.	.25	1.25	10.00	80.00

Conquest (Stoneless). A rare fruit having but a trace of stone in each fruit. Very much like the French prune in quality, deliciously sweet and sugary. Very productive; ripens evenly. July.

French (Petite d'Agen). The French prune of commerce. Medium size; purple; sweet and rich; standard for drying. One of the most valuable trees to plant. Very extensively planted. Aug.

German. Long, purple blue bloom; flesh green; free-stone. Valuable shipping. Aug.

Glant. Very large red fruit; flesh yellow; flavor good; valuable shipping. Aug.

Hungarian (Gros). Very large; reddish violet; juicy, sweet; a very profitable shipping variety. Aug.

Imperial. The highest priced and finest prune grown. Very large, violet purple. Very valuable drying and market variety on account of size and quality. Sept.

Robe d'Sargent. Large; deep purple; flesh rich and sugary; fancy prices when dried; two weeks earlier than the French. Aug.

Silver (Coes G. Drop). Largest size; pale yellow; profitable for bleaching and canning. Sept.

Standard. The largest of all prunes; valuable for drying and shipping fresh; deep blue, with fine bloom. Sweet, juicy and good. July.

Splendor (Burbank's New). Similar to the Imperial, with many good qualities for market. Aug.

Tragedy. Most valuable early shipping prune; large; good. Late June.

NEW PRUNES.

One year.	Each	10	100
4 to 6 ft.	\$0.40	\$3.00	\$25.00
3 to 4 ft.	.30	2.50	20.00

Sharpe's Improved French. The largest of all French prunes, quality identical, ripens at same time, and instead of pointed apex it is rather blunt; dries splendidly; ripens in August. From Millard Sharpe, Vacaville.

Sharpe's No. 1 French. Much larger than the French prune, and equally productive. In other respects identical. Aug.

Sharpe's No. 2 French. Differs slightly from No. 1 in form, otherwise the same. All these three French prunes are superior to any of the so-called pedigreed and Improved French prunes that we have seen—in size, drying and quality.

APRICOT—On Peach and Apricot.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$1.50	\$12.50	\$100.00
3 to 4 ft.	.25	1.25	10.00	90.00
2 to 3 ft.	.20	1.00	9.00	80.00

APRICOT—On Myrobolan.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$2.00	\$15.00	\$125.00
3 to 4 ft.	.25	1.50	12.50	100.00
2 to 3 ft.	.20	1.25	10.00	90.00

Blenheim. Above medium size; deep yellow; juicy, rich flesh; in great demand both for canning and drying; bears regular crops without missing. Middle June.

Moorpark. Very largest, red on sunny side, finest flavor; usually does not bear well. Late June.

Colorado. Originated in Nebraska. Fine, large fruit resembling the Tilton; a very heavy bearer. July.

Cluster. From Texas. This is medium size and is claimed to bear immense crops every year. July.

Routier's Peach. Yellow; very large; flesh juicy. Middle June.

Tilton Apricot. Orange yellow; fine flavor; very heavy bearer; valuable for canning and shipping. June.

Wenatchee Moorpark. A true Moorpark except in color; bears a heavy crop; fruit large, juicy and sweet; valuable. July.

PEACH—On Peach.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.25	\$1.25	\$10.00	\$90.00
3 to 4 ft.	.20	1.00	9.00	80.00
2 to 3 ft.	.15	.90	8.00	70.00

Freestones.

Admiral Dewey. Large, handsome; the first early yellow fleshed variety to ripen; a good market sort. June 15.

Alexander. Large; greenish white, shaded red; juicy, sweet; a standard shipping variety. June 1.

Briggs Red May. Large, white with blush red cheek; recognized market variety. June 15.

Billyeu's Late. Large, white skin, red cheek; excellent late shipper. Oct.

Carmen. Very large, white peach, with red blush all over; bears more large peaches without extensive thinning than any other peach; juicy, sweet, high quality. Fine for home and local market. July.

Foster. Large; yellow, dark cheek; fine for drying, market or canning. July.

Elberta. Very showy and one of the best table and market varieties. Aug. 1.

Early Crawford. Magnificent yellow peach of the best quality; a very popular variety. July.

Hale's Early. Large; skin greenish mottled red; flesh white, juicy, sweet; highly flavored and one of the best early sorts. June 25.

Fay Elberta. The finest of the Elberta type; very large, deep yellow, small pit and a delicious peach. Aug. 1.

Lovell. Leads all other pure yellow freestones; fine for drying and market. Aug. 1.

Greensboro. Among the earliest and largest; creamy white with faint blush; a valuable peach. May 1.

Late Crawford. Very large; yellow, with red cheek; flavor fine; dries well. Aug.

Muir. Very large; flesh clear yellow, very rich and sweet. The leading drying peach of California; good for canning. July 30.

Salway. Large; flesh deep yellow; rich and sweet; good for canning and drying. Sept. 15.

Strawberry. Medium white, marbled dark red; flesh white, juicy, with rich flavor; good table sort. Early July.

Clingstones.

California Cling. Very large, round; orange colored skin, covered with rich dark red; flesh deep yellow, with delicate, rich flavor; one of the best. Aug.

Heath (White Heath). Very large; creamy white, with faint blush; flesh white; highly flavored; one of the best for canning. Sept.

McKevitt. Creamy white; flesh firm, rich and sugary. Fine for home canning. Late Aug.

Orange. Very large; yellow with dark red cheek. An old favorite. July 30.

Phillips. Large; yellow; flesh firm, clear yellow; always commands the highest price for canning. Sept.

Runyon's Orange. Very large; rich golden; fine for canning. Aug. 15.

Sims. A Phillips cling, ripening two weeks earlier than the old variety. Otherwise identical with that variety. Aug. 15.

PEACHES—New Varieties.

(We have made a careful selection of the best of the new varieties after having given them a thorough trial, and our descriptions are as we find they grow. These are worth a place in home orchard, and some are very valuable market and shipping sorts.)

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$2.00	\$15.00	\$125.00
3 to 4 ft.25	1.50	12.50	100.00
2 to 3 ft.20	1.25	10.50	95.00

Freestones.

Bassford (Helen). Originated at Vacaville, Cal., is a seedling of the Salway, and is a much larger and better peach than that variety.

Connett's Southern Early. Creamy white, with pretty red cheek; large; of fine flavor, and a good early variety. June 1.

Early Canada. Ripens a month before Crawfords Early. Large; yellow; and similar to that variety. June.

Early Elberta (Starks). A finer peach than the old Elberta; ripening just before that variety. Beautiful color and excellent quality. July 15.

Honey. We have a collection of four of these old-fashioned Honey freestones, ripening from August till October. The fruit is medium size and is the most delicious flavored of all peaches.

Improved Crawford. A chance seedling in a nursery row where some trees were left till they fruited. Larger and finer quality than the Early Crawford or Foster, ripening with these varieties. July.

J. H. Hale (Stark's). An Elberta seedling originated by the great peach king, J. H. Hale, and is a very beautiful peach; quality same as Elberta, but fruit is showier and is claimed to top the peach market in the East. A valuable variety. Our stock is propagated from trees we bought direct from Stark.

Krummels. Very large, round peach, similar to the Salway. Rich golden, with blush rose cheek; firm, melting, rich and a good keeper and shipper. Oct. to Nov.

Mayflower. The earliest peach; red all over; tree very vigorous, heavy bearer and one of the most valuable sorts. Early May.

Leader (Burbank's). Combines the best qualities of the Muir and Crawford. Beautiful yellow, red blush; pure yellow; sweet and delicious. The dried fruit looks like transparent wax. Aug. 1.

Mother's Peach. This peach, with Tribble's Pride, is unlike any other peach. Very large; unsurpassed in beauty of coloring; flesh marbled red and white; flavor sweet and delicious; very attractive; eagerly sought for by local peddlers and trade. Tree the very largest size and wonderfully productive. One season, after half the crop had been gathered, the other half sold for \$5.00 on the tree.

Everbearing. A large, coarse fleshed peach with peculiar agreeable flavor. Skin greenish mottled red; flesh white covered with blood red near the skin. Ripens over a long period. July-Aug.

National (Burbank's). A firm and delicious peach canned; very large sweet and good. Sells well in any market. Similar to the Leader, but ripens two weeks earlier. July 15.

Oklahoma Beauty. Extremely large; high color; among the best in quality; white flesh. May.

Oklahoma Queen. Very similar, if not identical with the Carmen, but ripens about two weeks earlier. A very fine peach.

Old Mixon. Large, pale yellow, with red cheeks, flesh white, tender and excellent; rich, sugary flavor. A very old variety and favorite home and market variety. We were requested to propagate this variety for a patron and have a good supply of this fine variety. Sept. 1.

Sage (Sonderreggers). From Nebraska. An abundant bearer; yellow; very firm and good quality; large. Oct. 15.

Stearns. Nearly perfect in form; very large; beautiful colored; yellow flesh; very small pit; a valuable variety for market, canning or drying. Aug. 15.

Sutter Creek. A fine large yellow Crawford type; fine flavor; extra showy and quality. Claimed to be free from curl-leaf. Originated at Sutter Creek, Amador County. Aug.

Tribble's Pride. Seedling of "Mother's" peach, and has all its qualities; ripening earlier than that variety. Very large, beautiful peach; round, firm, sweet and sugary. Has attracted much attention from our visitors and local trade. Prof. C. O. Smith of Whittier, Cal., took some buds of this, stating that "this is just the peach for me." Millard Sharpe of Vacaville states "one of the finest peaches."

Vainquer. Introduced from Granada, Spain. The earliest of all peaches to ripen. Good size, firm, sweet and by far the best quality of any early peaches. Skin creamy, covered with blush; white flesh. May 10.

Wilets. The largest and best; very late; white freestone.

New Clingstones.

Blood Cling (Indian Blood). Medium size; clouded purple red; flesh deep red; in great demand for local use in canning, preserving, etc. July 10.

Adams Cling. There is no cling better than this new variety, originating near Acampo. Very large, clear yellow to pit; extra firm, round, sweet and fine flavor. Aug.-Sept.

Mammoth White Heath. One third larger than the White Heath. Skin creamy yellow, covered with a rich blush; flesh pure white to pit. None finer. Will eventually supercede the White Heath. Sept.

Honey Cling. The old-fashioned Honey peach, but not listed by other nurseries of late. The sweetest of all peaches; medium size. Aug.

Red Bird. A remarkable peach, ripening with the Mayflower; large, round; rich creamy white; skin a bright red; bears early. May.

NECTARINES.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$1.50	\$12.50	\$100.00
3 to 4 ft.	.25	1.25	10.00	90.00

Boston. Large; deep yellow, with red blush; flesh yellow without any red at stone; sweet, pleasant peculiar flavored freestone. July.

Hardwicke. Very large; pale green on shaded side; covered with dark red; flesh greenish, melting, juicy, rich and highly flavored; a delicious fruit. July.

Humboldt. Largest size; skin streaked orange yellow; very tender flesh, juicy and richly flavored. Sept.

New White. Large; greenish white; a popular variety. July 1.

Quetta. Recently introduced from Quetta, British India. Very large, beautiful color, rare rich flavor; heavy bearer. Aug. Price, 50c each.

Large Red (Tribble). A seedling originating on our Elk Grove place. Very large; skin deep marbled red; very firm; productive and superb quality.

Sharpe's. A wonderful new nectarine from Vacaville. Has all the good qualities for canning, drying and shipping. Price, 50c each.

Stanwick. Very large; skin pale, shaded light red; flesh white, tender, juicy. The best known variety for canning, drying and shipping. Aug.

ALMONDS—On Almond and Peach.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$1.50	\$12.50	\$100.00
3 to 4 ft.	.25	1.25	10.00	90.00
2 to 3 ft.	.20	1.00	9.00	80.00

June Buds—				
2 to 3 ft.			9.00	80.00
1 to 2 ft.			8.00	65.00

ALMONDS—On Myrobalan.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.35	\$3.00	\$21.50	\$190.00
3 to 4 ft.	.30	2.60	20.00	175.00
2 to 3 ft.	.25	2.25	16.00	135.00

Drakes Seedling. Regular and abundant bearer; late blooming; soft shell; a profitable variety.

Cunningham No. 1. Originated with Mr. C. B. Cunningham of Mills, Cal. Very large; paper shell; kernel large, slightly flattened; excellent flavor, and one of the most productive almonds we have seen. Samples of this submitted to Mr. Tucker of the California Almond Growers' Association were considered very favorably.

Cunningham No. 2. Same origination as above. Very large; paper shell; kernel exceptionally large, full and round; no twin kernels; a heavy bearer, but not quite so heavy as No. 1. Considered very promising by Mr. Tucker.

I. X. L. One of the finest soft shells; where it is adapted it bears the largest crops, but rather choice in its location. Very large. None better where it grows well.

Eureka. A very prolific, attractive, medium size, paper shell. Never fails to set a crop.

Jordan. The famous Spanish variety. Hard shelled, with very large kernels, used for salted almonds.

Ne Plus Ultra. Large and very long, soft shell; rapid grower; regular and heavy bearer in some localities.

Nonpareil. The highest priced almond; one of the best; heavy bearer, paper shell. Planted successfully in all almond districts.

Peerless. Preferred by some to the I. X. L., which it resembles. Nut is larger.

Texas Prolific. Surest cropper of all almonds. Best for pollination purposes. Two weeks later blooming than any other variety. Soft shell, husks easy and is one of the best moneymakers. Adapted to all localities.

QUINCE—On Quince.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$2.00	\$15.00	\$125.00
3 to 4 ft.	.25	1.50	12.50	110.00
2 to 3 ft.	.20	1.25	10.00	100.00

Champion. Large bright yellow; productive; fine for canning and shipping. Sept.

Antiquera. Recently introduced from Granada, Spain. The finest of quinces; pure yellow; medium size, melting and exquisite flavor. Ripens very early. Price, 50c each. Aug.

Orange. Large; golden color; fine for preserves; flavoring or shipping. Sept.

Missouri Mammoth. Specimens weigh 3 pounds; immensely large; greenish yellow and attractive. Sept.

Pineapple. Cooks tender and makes fine preserves; also valuable for shipping. Sept.

Reas Mammoth. Large; bright yellow; very productive. Oct.

Smyrna. The finest shipping variety, elongated and makes an attractive pack. The showiest of all quinces and the most productive. Sept.

Van Deman. A fine large fruit of superior quality, and bears well. One of the best. Sept.

FIGS.

One year.	Each	10	100	1000
4 to 6 ft.	\$0.30	\$2.00	\$15.00	\$125.00
3 to 4 ft.	.25	1.50	12.50	100.00
2 to 3 ft.	.20	1.25	10.00	90.00

Brown Turkey. The earliest large fig; color violet brown; fine flavor and of the very largest size; bears two heavy crops a year. June and Aug.

Black Durro. The largest fig known. Dark purple; one flesh; bears two heavy crops and brings the highest price as fresh fruit. Price, 50c each.

Calimyrna. Large to very large; lemon yellow; pulp pale amber. This is the true Smyrna fig, which is dried and sold in fancy packages. The finest of all dried figs. Capri trees must be planted with the Calimyrnas, otherwise they will not set any fruit.

Mission or California Black. Tree grows to great size; probably produces more tonnage to the acre than any other fig; valuable for preserving, drying and shipping as fresh fruit.

San Pedro Black. Larger than the Mission and of splendid quality, and is being extensively planted the past two years.

San Pedro White "Apple Fig." Excellent flavor, skin golden yellow; first crop ripens when there are no other figs in the market; very palatable.

White Adriatic. Fruit very large, greenish yellow; pulp a pretty red. Second crop often sours on the tree. Extensively planted for canning and drying.

White Endich (Kadota). The finest of all figs for preserving; medium size; thin, white skin; should be planted for home use as well as for market.

Placer Smyrna (2182 S. P. I.). A seedling from the Maslin orchard and seems to be a close rival for the Calimyrna. This is one of the seedlings we received from the Department of Agriculture, and is the finest fresh fig we have ever eaten. Fig very large, flat, skin light brown, pulp light amber, syrupy and very sweet. Requires Capri figs. 50c each.

Capris. We have the largest collection of capri figs in the State, having all the varieties listed by other nurseries, and 37 varieties we have grown from seed. These cover a period from June 20th to August 15th. We have selected a number of the best of these for propagation, and offer them for sale for the first time this season.

Fig Insects (Blastophaga). We usually have a crop of 50,000 of capri figs carrying these insects, necessary to produce a crop of Calimyrna and other Smyrna figs. They also cause the other fig varieties to bear heavier crops and better flesh. Those in need of these we will be glad to send prices.

WALNUTS—(Seedlings.)

One year.	Each	10	100	1000
6 to 8 ft.....	\$0.25	\$2.00	\$15.00	\$100.00
4 to 6 ft.....	.20	1.50	12.50	90.00
3 to 4 ft.....	.15	1.25	10.00	80.00

(N. B.—These trees have not been budded or grafted.)

Eastern Black (the black walnut of the East). A valuable timber variety.

California Black. Rapid growing, and the most desirable of all stocks of the English walnut. Adapted to all the Pacific Coast.

Paradox. A very rapid growing tree; a cross of the English and black walnuts. Susceptible to climatic conditions, especially late frosts.

Royal Hybrid. This is a very rapid growing tree, being a cross or hybrid of the California and Eastern Blacks. Our trees are first generation, being grown from Eastern black walnut seed pollinated by California Black. These are very highly recommended as stocks by the University of California.

WALNUT—On California Black.

(New Varieties.)

One year.	Each	10	100
6 to 8 ft.....	\$1.50	\$12.50	\$100.00
4 to 6 ft.....	1.25	10.00	90.00
3 to 4 ft.....	1.00	9.00	80.00
2 to 3 ft.....	.90	8.00	70.00

***Glady.** The most prolific and best filled of all large walnuts; very large, shell slightly indented, white kernel, superb quality; blooms very late.

Krapp. A beautiful, large, smooth walnut of the Mayette type; heavy bearer; does not burn or blight. Well filled, white pellicle and a very worthy walnut. Blooms late.

***Mayquette.** A fine walnut of our own breeding and has stood very rigid tests and proved worthy. Described in our Walnut Book.

***Payne.** The most prolific walnut we have ever seen, nearly equals the Mayette and Franquette in quality. Large, exceptionally well filled; very light pellicle and one of the very best. This has been extensively planted around Linden, San Joaquin County, and has produced great crops. Blooms medium early.

***Payou.** The largest walnut. Produced by Geo. C. Payne of Campbell, Cal. Well filled for so large a walnut, beautiful white meat; just the kind you want to show some of your city friends when they visit you. Blooms last of March.

Westfall. From Mr. J. C. Westfall of Colusa County, who has a tree that produced 28 lbs. of walnuts four years from planting. Nut is very large, beautiful white shell, well filled, white pellicle and a very promising variety. Blooms first of April.

Woodland. Very similar to the Westfall, except it is larger and more pointed at the apex. Very heavy bearer.

Wheeler Franquette. An abnormally large type of the Vrooman Franquette with all the good qualities of that variety. Blooms April 15.

Solano. Originated near Vacaville, where it produces heavy crops, and is not subject to sunburn or blight. Nuts medium size, white pellicled meat that completely fills the shell which is well filled.

WALNUT—On California Black.

One year.	Each	10	100	1000
6 to 8 ft.....	\$0.80	\$7.00	\$60.00	\$500.00
4 to 6 ft.....	.70	6.00	50.00	400.00
3 to 4 ft.....	.60	5.00	40.00	300.00
2 to 3 ft.....	.50	4.00	30.00	200.00

***Bijou.** Very large, the quality is delicious, heavy bearer and showy.

Bacon. A fine walnut originating from seed sent out by Mr. G. P. Rixford as premium with the San Francisco Bulletin. Bears very heavy crops of fine walnuts of the Parisienne type. Said to not sunburn or

blight and is in great demand by the local trade. Blooms fairly late.

***Chase.** A heavy bearing early blooming type of the Santa Barbara soft shell. Finely filled and of good quality.

***Cut-leaf.** A medium sized nut of superior flavor; very heavy bearer; does not blight and is the most beautiful of walnut trees. Very valuable as a lawn tree as well as for its nuts. The foliage is lacinated and looks very much like the foliage of the peach.

***Butternut.** The old-fashioned butternut of the East. Highly prized by the older Eastern people. Grows and bears well in California.

***Concord.** An exceptionally heavy producing walnut, of medium size and quality. Blooms early.

***Franquette (Vrooman best selected).** This walnut is so well-known that it hardly needs detailed description. We have selections made by F. S. Leib and Geo. C. Payne from the best trees of the Vrooman orchard after several years selection. More extensively planted than any other variety; large, smooth, well filled and sealed, white pellicle. Brings highest prices. Blooms April 12.

Franquette (Kerr). Imported by the late Mr. G. H. Kerr from Troyes, France. Larger than the Vrooman type and much heavier bearer. Prof. L. D. Batchelder of Experiment Station at Riverside, Cal., says: "This is the most productive Franquette I have seen."

Leib's Mayette. A very large, fine walnut, pretty, smooth shell, well filled and blooms late.

***Manchuria.** A variety from the mountains of Manchuria, and should stand more cold than most varieties. Nut large, well filled and blooms late.

***Neff's Seedling.** A splendid variety for Southern California. Very heavy bearer of the Santa Barbara type. Nuts large, well filled, pellicle white and good flavor; shell inclined to be rough; blooms early.

***Peanut.** A peculiar Eastern black walnut, which peculiar shape of shell allows the kernel to come out whole as in the English walnut. The shell is as hard as any black walnut. A very pretty tree.

***Calavette.** The finest and smoothest of the Bijou walnuts. Shell perfectly smooth, very well filled; heavy bearer and should stand considerable cold, as it originated in the Calaveras County mountains.

***Meylan.** We cannot speak too highly of this variety, the more we see it bear the more it proves itself one of the best. The most beautiful of walnuts, very smooth shell, well filled with white pellicled meat; fine quality, and the nut is larger than the Mayette. Blooms late and is first of the French varieties to ripen.

***Eureka.** This walnut has been so extensively exploited by the University of California that it is hardly necessary to describe it. We have been fruiting it seven years. The nuts are rather hard shelled, well sealed and well filled; quality fair. Blooms here in March.

El Monte. The largest of the Santa Barbara type of walnuts. Shell exceptionally thin, well filled, pellicle white; tree a very young and heavy bearer and a fine walnut; blooms early.

***Kerr or Tribble Mayette.** One of the finest of walnuts; an exceptionally good bearer, even under adverse conditions. Prof. R. E. Smith of the University of California says: "This Tribble Mayette is growing on shallow hard pan soil without irrigation or cultivation, and is producing fairly good crops of fine, well filled walnut, with white pellicle." Described more fully in our Walnut Book. A late bloomer.

***Parisienne.** Has been growing here for many years and always produces heavy crops of the highest quality walnuts. Nuts large, very uniform, well filled, well sealed, pellicle creamy white, quality splendid; leaves very large, and foliage heavy; blooms late.

***Treyve.** A promising new variety of the Parisienne type. Very much like the Kerr Parisienne with its good qualities and is worth trying.

***Wilson's Wonder.** A large precocious walnut of the Bijou type. We have the true variety, as we bought our first scions from Mr. F. C. Wilson, the originator. Blooms early.

Varieties marked with a * are fully described in our Walnut Book.

PECAN—Grafted on California Pecan.

One year.	Each	10	100
12 to 14 ft.....	\$2.25	\$18.00
10 to 12 ft.....	2.00	17.00
8 to 10 ft.....	1.75	15.00
6 to 8 ft.....	1.50	14.00
4 to 6 ft.....	1.35	12.50	\$100.00
3 to 4 ft.....	1.25	10.00	90.00
2 to 3 ft.....	1.00	9.00	80.00

Delmas. Very large, shell very thin, can be crushed with the fingers. Filled perfectly, no corky substance. Heavy bearer. One of the best.

Frotscher. One of the best; nuts cylindrical; soft shell; kernel full.

Moneymaker. Medium size, shell very thin, quality excellent, bears young and heavy crops.

Pabst. Medium size; fine quality; heavy bearer.
Success. Very large, shell medium thin, exceptionally full kernel; bears well; tree very beautiful. One of the choicest.

Stuart. More extensively planted than any other variety. Does well in all localities. Nut very large, shell thin, well filled. Bears heavy crops.

Schley. Said to be the finest of all pecans. Medium size, paper shell, full kernel which is delicious. Does not bear as well as some of the above varieties.

PECAN SEEDLINGS.

Grown From Mixed Seed of the Above.

One year.	Each	10	100
10 to 12 ft.....	\$0.50	\$4.00	\$30.00
8 to 10 ft.....	.40	3.00	25.00
6 to 8 ft.....	.30	2.00	18.00
4 to 6 ft.....	.25	1.50	15.00

CHESTNUT SEEDLINGS.

One year.	Each	10
4 to 6 ft.....	\$0.40	\$3.50
3 to 4 ft.....	.35	3.00

American Sweet. A small variety growing wild in the Eastern States. Used for grafting the larger varieties on. The finest flavored of all chestnuts.

Spanish. Medium size nut; good quality; tree very ornamental.

FILBERTS—(Imported Hazel Nuts.)

One year.	Each	10	100
3 to 4 ft.....	\$0.60	\$5.00	\$40.00
2 to 3 ft.....	.50	4.00	30.00

Barcelona. Very large, red nut, sweet and good. One of the best.

Du Chilly. Long nut, highest quality and productive.

PERSIMMONS—(Japanese.)

One year.	Each	10	100
4 to 6 ft.....	\$0.35	\$2.50	\$20.00
3 to 4 ft.....	.30	2.00	17.50

Hachiya. Very large; conical; bright red; flesh deep yellow. One of the best. Sells for good prices. Sept.

Hyakume. Very large; orange color; juicy and not astringent. Oct.

Mammoth Goshio. One of the largest of the Japanese types. Very attractive, and sells at a good price. Oct.

Tanenashi. Very large, bright red; seedless; a good market variety.

Tribble's Seedling. Grown from seed of the Tanenashi, but is tomato shaped. Is free from astringency when hard and can be peeled and eaten like an apple. Ripens early. Large size.

Yemon. Large; dull red; flesh deep yellow; a fine fruit. Nov.

PERSIMMONS—(Chinese.)

One year.	Each	10
4 to 6 ft.....	\$0.75	\$6.00
3 to 4 ft.....	.60	5.00
2 to 3 ft.....	.50	4.00

Pang Shang. Very rare; fruit flat; red color; fine quality; large; heavy bearer.

Tamopan. Very large, with peculiar incision around middle of fruit. Non-astringent; can be eaten when hard and firm; heavy bearer; quality of the best.

Tald jat soa. Immensely large; flat; orange red; good quality; found growing in great orchards in Pautingfau valleys, China.

Ta shi tse. Large, flat persimmon averaging about 4½ inches in diameter. Red color and very highly prized by the Chinese.

OLIVES.

Caliper measure.	Each	10	100
1 inch up.....	\$0.60	\$5.00	\$40.00
$\frac{3}{4}$ to 1 inch.....	.50	4.00	30.00
$\frac{2}{3}$ to $\frac{3}{4}$ inch.....	.40	3.00	20.00
$\frac{1}{2}$ to $\frac{2}{3}$ inch.....	.30	2.00	15.00

(On large orders write for our special quotations, stating sizes wanted.)

Manzanillo. One of the standards for green and ripe pickles; produces oil of superior quality; very hardy; regular and prolific bearer. Last of Sept.

Misslon. Medium to large; the best pickling olive; where properly cared for produces heavy crops and is more profitable than any other olive.

OLIVES.

Ascolano. Bears early and is the largest of all olives; makes a fine pickle, but is very hard to handle, and is not worth the trouble for home use. Special processes are required.

Sevillano (Spanish Queen Olive). The Queen olive of commerce. A fine large olive making beautiful green pickles, but is like the Ascolano, that it requires special process for success, which are too complex for home use.

PRICES OF ASCOLANO AND SEVILLANO OLIVES.

One year.	Each	10	100
1 inch up.....	\$1.00	\$9.00	\$75.00
$\frac{3}{4}$ to 1 inch.....	.90	8.00	70.00
$\frac{2}{3}$ to $\frac{3}{4}$ inch.....	.80	7.00	60.00
$\frac{1}{2}$ to $\frac{2}{3}$ inch.....	.70	6.00	50.00

MULBERRY—Budded on Russian Stock

One year.	Each	10
4 to 6 ft.....	\$0.50	\$4.00
3 to 4 ft.....	.40	3.50

Mulberries are very valuable in keeping the birds from damaging other fruits, during the time mulber-

ries are ripe as they prefer them to any other fruit. This season the birds were very bad on our first cherries, but as soon as the mulberries were ripe they did not bother the cherries any more. They are also valuable for chickens and make delicious pies.

Hicks. A very large tree, producing large fruit in great quantities; ripens over a long period.

New American. Vigorous grower; fine large leaves; fruit large black; ripens later than other varieties.

Russian. A hardy, rapid growing tree, fruit small, black and produces great quantities of it; the best for cooking.

Tea's Weeping. One of the most graceful of weeping trees. The slender branches droop parallel to the tree. Where properly trimmed it will produce a wonderful shade, as the inner limbs die as the outer ones grow, and if these dead limbs are cut it forms a perfect tent or arbor. Fine for lawn and chicken parks.

Malpay. Sport of the Malvoise, discovered by Geo. C. Payne of Campbell. One of the finest black grapes grown; very sweet; of the largest size; bunches large and compact; ripens first of August.

Maraville d'Malaga. A most promising new variety; bunches long loose; berries large, conical; a long keeper Sept.

Mollnera Gorda. Introduced by us from Spain. Color even finer than the Tokay; ripens three weeks earlier; large; sweet; exquisite flavor; very crisp and firm; heavy bearer; bunches large and loose. Aug. 1.

Oilvette Blanche. Grapes very largest size; 2 inches long; olive shape; amber colored; crisp and firm; very heavy bearer; packs very attractively. Sells at the highest prices. Sept.

Panariti. This grape produces the so-called dried currants. Berries about the size of elder berries, bunches quite heavy; a beautiful wine color, transparent, seedless and a heavy bearer when trellised. Should be planted for home use. Sept.

Pizutello d'Roma. A delicious grape for raisins, some times erroneously called Lady Finger. Grapes 1½ inches long; olive shape; very sweet; skin thin; bunches very large and a heavy bearer. A valuable drying and shipping variety.

Red Hanepoot. A fine, light red, large Muscat from South Africa. Heavy bearer and very valuable shipping variety on account of its fancy color.

Sultanini Rosea (Red Thompson Seedless). Larger than the Thompson, even a heavier bearer, and very valuable for drying and shipping.

GRAPES—(Foreign.)

One year.	Each	10	100	1000
Rooted vines	\$0.10	\$0.75	\$2.50	\$15.00

Black Cornichon. Bunches long; berries long; skin thick and dark; flesh firm; good flavor; good shipper. Oct.

Black Ferrera. Large, black with violet bloom; flesh sweet; valuable for shipping. Sept.

Emperor. Large; oblong; deep rose; one of the most profitable varieties on account of its lateness; stands considerable rain. Nov.

Malaga. Very large; oval; yellowish green; fleshy; very productive; fine for shipping. Aug.

Muscat. Very large; golden white; extensively planted for raisins; fine for wine and shipping. Sept.

Gros Colman. As large as Damson plums; skin thin, dark; covered with bloom; flesh firm and of very pleasant flavor. Oct.

Sweetwater (Fontainbleau). Medium size; round; greenish yellow; pulp juicy, sweet; very prolific. Aug. 1.

Rose of Peru (Black Prince). Large, round; highly esteemed as a market variety. Early Sept.

Thompson's Seedless (Sultanina Blanche). Very large; greenish yellow; firm; oval; seedless; very valuable for shipping and raisins. Aug.

Tokay (Flaming Tokay). Large, pale red; covered with bloom; flesh firm, sweet; more extensively planted for shipping than any other variety. Brings high prices in Eastern markets. Aug.

AMERICAN TABLE GRAPES.

	Each	10	100
Rooted vines	\$0.15	\$1.00	\$8.00

Catawba. One of the best red varieties; berries large and rich. Sept.

Concord. Bunch and berry very large; blue black, sweet and tender. Aug.

Isabella. Berries black, oval, juicy, sweet; decided musky flavor; an immense bearer and valuable market variety. Sept.

Niagara. Pale yellow; flesh tender; sweet; the best white grape. Sept.

Pierce (Isabella Regia). Very largest size; very sweet; fine for arbors; leaves very large; finest of American varieties. Sept.

Worden. Bunch and berry large; black; compact; handsome; fine table grape. Aug.

WARNING.—A number of the counties of this state have quarantine established against rooted grape vines. Be sure you inquire in regard to this before ordering grape vines, as we cannot be responsible for vines ordered under this quarantine. Such orders will be at purchaser's risk.

WINE GRAPES.

Write for quotations.

FANCY FOREIGN GRAPES.

	Each	10
Two year	\$0.35	\$3.00

Flame Muscat. A beautiful, very large, rose colored Muscat; very firm, sweet and good; brings fancy prices in the East.

Kandihar. A Persian variety of immense size; beautiful creamy amber color; firm flesh and a splendid variety.

Malaga Rose. A Malaga with the color of the Flame Tokay; large; heavy bearer, and ripens early in August. A fine variety.

POMEGRANATE.

One year.	Each	10	100
3 to 4 ft.	\$0.50	\$4.00	\$30.00
2 to 3 ft.40	3.00	25.00

Spanish Ruby. Medium size, beautiful color; high priced market variety. Early.

Sweet Fruited. Large, greenish striped with red; fine variety; sells well. Oct.

Wonderful. Largest size and the showiest of all pomegranates, and ships and sells well. Sept.

BERRY PLANTS.

	Each	10	100	1000
Rooted tips	\$0.10	\$0.75	\$2.50	\$20.00

Himalaya Giant. Latest blackberry; large and very productive; bears on same canes year after year, and the plant grows to immense size. Very sweet; delicious with musky flavor.

Loganberry. Fruit very long; has flavor of both blackberry and raspberry; one of the finest and most profitable berries.

Mammoth Blackberry. Deep red; very early; largest of all blackberries; enormously productive and the best in quality.

Phenomenal Berry. Very similar to the loganberry, probably more tart and not quite as productive. A fine berry.

Crandal Blackberry. Everbearing; large; fine; very early; one of the best. (\$15 per 1000.)

Lawton Blackberry. Large; ripens late; very productive; very extensively planted. (\$15 per 1000.)

Lucretia Dewberry. Very large; glossy black; luscious flavor; very productive. (\$12 per 1000.)

California Surprise Raspberry. Red; sweet; large and good; very productive and profitable. (\$15 per 1000.)

Cuthbert. Red and an old standard variety. Does well everywhere. (\$12 per 1000.)

Superlative. Red. Great claims are made for this variety. (\$25 per 1000.)

Gregg Black Cap Raspberry. Productive and large. An old standard.

Cumberland. Largest black cap and enormously productive. Berries often one inch in diameter. Very sweet and good. (\$25 per 1000.)

Plum Farmer. A dandy black cap and a very productive black cap. Laterals grow up the canes like limbs on a tree. Sweet, large and good.

Kansas. An old standard black cap variety. Productive and good.

BERRIES—(New.)

One year.	Each	10	100
Berries	\$0.25	\$1.75	\$17.50

Cardinal Raspberry. Purple cap; enormous grower and enormously productive; very highest quality; fruit very large.

Idaho Raspberry. Bright red; largest of all raspberries; specimens measure 1½ inches in diameter; very productive and very firm.

Royal Purple. Similar to the Cardinal raspberry, but sweeter. Enormously productive over a long season; berries large.

CURRENTS.

One year.	Each	10	100
Currents	\$0.15	\$0.75	\$6.00

Cherry. Very large; deep red.

Fay's Prolific. Bright red; very sweet.

White Dutch. The best of the white varieties.

Black Naples. Hardest and best black variety.

GOOSEBERRIES.

One year.	Each	10	100
Gooseberries	\$0.20	\$1.75	\$10.00

Downing. Good size; whitish green; good.

Oregon Champlon. Very large; brownish red.

STRAWBERRIES.

One year.	10	100	1000
Strawberries	\$0.25	\$1.00	\$4.00

Dollar. Firmest variety; shipped extensively from the Sacramento Valley districts.

Early Ozark. Earliest good berry; very firm; fine color; fine flavor; ships well, and bears more good berries than any other variety. Can't be beat for profitable planting. Bears throughout the season.

Magoon. A splendid market and home variety; berries very large and fine color; very productive.

Marshall. No better or larger berry grown. The best home berry of all; beautiful deep red color; finest flavor and very sweet; good bearer.

Wm. Belt. The next best berry for home use; enormous size; mealy; very sweet and a good bearer; some of the first crop grows in most peculiar flat forms; late.

(We recommend for home use Early Ozark for early berries; Marshall for mid-season, and Wm. Belt for late. These three cannot be beat.)

STRAWBERRIES—

(New and Everbearing.)

One year.	10	100
Strawberries	\$0.75	\$3.00

Ettersburg 80. A new type, both in plant and berry. Berries fine flavor and sweet.

Superb Everbearing. One of the three good varieties of these everbearing varieties. Berries medium size and very good. Fairly productive.

Productive. Well named, as it certainly has rows of large berries all around each plant. Quality medium.

Progressive. A small variety, bearing quite heavily and the berry is rather sweet without much flavor. Bears early and late.

These three everbearing varieties make very few plants.

RHUBARB.

	Each	10	100	1000
Divided roots	\$0.10	\$0.75	\$6.00	\$50.00

Burbanks Crimson Winter. Pale, greenish crimson. Bears throughout a long season.

Burbanks Giant. An enormously large variety of the above.

Wagner's Giant Crimson Winter. The largest of all and a money producer when grown for the market.
